

# PVC DISTRIBUTOR HUBS

TOUGH STUFF® Distributor Hubs are machined of solid PVC bar stock for maximum quality and durability. Standard hubs are stocked with side inlets drilled and tapped 90° perpendicular to the main piping thread. The side inlets Type A and Type B hubs are drilled and tapped at approximately a 13° angle. Side inlets angled upward place the hub and laterals assembly lower in the dish of a tank, utilizing more of the tank's capacity. When ordering, please specify Type A, Type B or Standard hub.

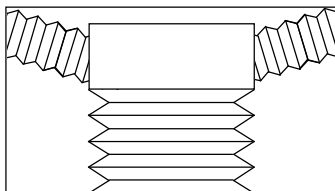

Custom modifications, such as female sockets, number of inlets and degree angles are available. TOUGH STUFF Distributor Hubs can be manufactured from materials other than PVC, including CPVC, polypropylene, Teflon and PVDF. Please contact your MATTSON/WITT sales representative to discuss custom sizes, configurations and materials.
