PVC SLOTTED RISER TUBES

TOUGH STUFF® Slotted Riser Tubes are fabricated of high quality PVC pipe, slotted and plugged at one end. The opposite end is also available with either a chamfered slip connection or an MNPT adapter.

The open area of slots in a MATTSON/WITT slotted riser tube is engineered to be equal to or greater than 1-1/2 times the cross sectional open area of the pipe. This ensures minimal pressure drop when in service.

TOUGH STUFF Slotted Riser Tubes are available in plastics other than PVC, including CPVC, polypropylene, Teflon and PVDF. Please contact your MATTSON/WITT sales representative to discuss custom sizes, configurations and materials.
